

COVID-19

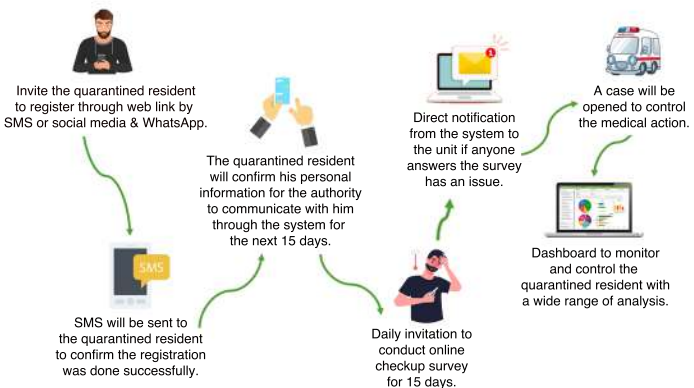

Communication Management System (COVID-19 CMS)

How COVID-19 CMS Works

CONTROL OF A GROUP OF RESIDENTS FOR A SPECIFIC PURPOSE

DAILY HOME SELF-QUARANTINE MONITORING

Benefits of COVID-19 CMS

Control

Ability to control the population of a country which are being quarantined at home, or at the hotels, hospitals or medical centers.

Notifications

COVID-19 CMS comes built with instant notifications that we can customise for you to send to different outlets or relevant parties for assistance purposes.

Different Methods of Surveying the Residents

Sending out an online survey link or an SMS through the mobile phone, or using CATI, CAPI or CAWI.

Different Ways to Send Surveys to the Residents

Sending residents a survey invitation link or an SMS getting government staff from call centers to call them, or publicizing the surveys through social media or newspapers.

Centralised Dashboard for Accurate Decision-Making

The real-time, centralised dashboard of COVID-19 CMS is able to provide instant data and analytics to the government on the health conditions of the residents.
